Digital Printing Lines

Expertise and reliable partnership for optimal cooperation

Innovation with a long tradition

Today, Hymmen is a high-tech company with a global network.

With some 200 employees worldwide, we take on investment projects for customers from a broad spectrum of business sectors. Our focus: technology for the production of panel materials and the surface finishing of panel and web materials

Applications:

- Lacquering Lines for furniture boards and furniture parts
- Lamination lines for furniture and kitchen worktops
- Double Belt Presses and Multi Opening Presses for the production of HPL/CPL and compact boards
- Digital Printing Lines for furniture and flooring

Established in 1892, Hymmen is a family-run company now in its fourth generation of developing machinery and plant engineering solutions that help shape the future.

Your technology partner with high-tech process expertise

In that time, we have fostered strong relationships with our customers who value not only our expertise and outstanding quality, but also our reliability and customer-centric approach.

Hymmen has its headquarters in Bielefeld, Germany. This is where we develop designs and technologies that help improve the efficiency of industrial production processes around the globe.

In all this time, we have remained true to our core values: we put you, the customer, first.
